

**November 2015**

**Student feature – Miss Heritance Mathebula**

uBambiswano learner Heritance Mathebula will be joining St Andrew's School for Girls for Grade 8 2016 through an Allan Gray scholarship. We caught up with Heritance to learn a little more about her...

*Describe your background:*

I am 12 years old. I go to school in Putfontein. I live in Daveyton with both my parents. I have a sister who was also an uBambiswano learner. She is now studying Chemical Engineering at the University of Pretoria.

*How has the experience of being at uBambiswano benefitted you?*

It has benefitted me very much. Through uBambiswano I was able to apply for an Allan Gray scholarship. I've learned many things at Saturday School, including how to swim. I am very thankful for the opportunity and the support I have received from my teachers.

*How are you feeling about being at St Andrew's next year?*

I am very excited! I just wish the days would go faster. I can't wait to be a student at St Andrew's. When I started Saturday School I always dreamed of being a student here one day. I still can't believe that my dream is actually coming true.

*What are you looking forward to at St Andrew's?*

I'm looking forward to everything, to waking up at school and to playing different sports.

*What are you expecting to achieve at St Andrew's?*

I'm expecting to achieve good results and to learn more about myself. I intend to study hard, learn new things and prove to myself that I can do more.

*What are your hopes for the future?*

I want to always do my best and hopefully become a mechanical engineer because I love Maths.
